JOIN US IN LAS VEGAS!

On behalf of the Foundation for Orthopaedic Research and Education (FORE) and our fellow esteemed Faculty, it is our pleasure to announce the inaugural Critical Concepts in Shoulder & Elbow Surgery Course scheduled for October 13 – 15, 2022 at the Encore at Wynn® Las Vegas in Las Vegas, NV.

Shoulder and elbow conditions may be focused anatomically, but the pathologies encountered in these two joints and their respective treatments could not be more diverse: from irreparable cuff tears to sports injuries; arthroscopy, arthroplasty, and fracture management; biologics; advanced technology, you name it! The field is so wide that a focused review on what's really critical and what you really need to know, is very helpful.

Learn from world-class Faculty with three days of didactic presentations, interactive case-based panel discussions, video vignettes highlighting surgical techniques, and industry-sponsored sessions. The comprehensive educational agenda will include:

- Fractures of the clavicle, shoulder, and elbow
- Management of sport shoulder and elbow injuries
- The whole spectrum of rotator cuff tears, including salvage options
- Anatomic and reverse shoulder arthroplasty: when, why, and how!

We look forward to seeing you in Las Vegas for a focused review of critical concepts that simply cannot be missed!

Critical Concepts in Shoulder & Elbow Surgery

October 13 - 15, 2022 | Las Vegas, Nevada

Target Audience

Orthopaedic surgeons, fellows, residents, physician assistants, physical therapists, and other healthcare professionals whose scope of practice includes surgical and non-surgical management of shoulder and elbow injuries and disorders.

Learning Objectives

- Evaluate diagnostic options and develop treatment strategies for shoulder injuries including instability, rotator cuff injuries, and labral tears
- Evaluate rotator cuff repair options for different patient categories; understand and evaluate the benefits associated with various rotator cuff repair techniques (single-vs. double-row, knot vs. knotless, and the use of augmentation devices)
- Compare the various treatment options for massive, retracted, and irreparable rotator cuff tears; consider repair strategies that optimize outcomes for failed rotator cuff repairs
- Compare diagnostic and treatment options for anterior, posterior, and multi-directional instability; understand surgical options in managing glenoid bone loss in shoulder instability
- Apply the latest and current treatment techniques in sports medicine and orthopaedic practice
- Compare treatment and management options for shoulder arthroplasty patients; understand differences and potential benefits between hemiarthroplasty, anatomic total shoulder arthroplasty, and reverse shoulder arthroplasty
- Implement the latest, cutting-edge techniques and technologies
- Identify strategies to improve outcomes of shoulder fractures and dislocation

Accreditation Statement

The Foundation for Orthopaedic Research & Education (FORE) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. FORE designates this live activity for a maximum of 19.75 *AMA PRA Category 1 Credit(s)*™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
